

SpilMax[®]

FLOOR SWEEP

Floor sweeps are great for cleaning up spills of hydrocarbons, water based chemicals and solvents. They are not appropriate for alkalis, strong oxidisers, acids and caustics.

PREMIUM PLUS

SpilMax[®] Premium Plus Floor Sweep is typically used for hydrocarbon based spills.

This product is manufactured from a special selection of recycled organic cellulose matter. Premium Plus Floor Sweep has a rapid absorption rate and encapsulates liquids so they cannot leach back into the environment.

This product meets the EPA criteria for disposal at land fill.

CODE	UOM	WEIGHT	QTY
CH3000	BAG	10 KG	72/PALLET
CH2998	BAG	5 KG	96/PALLET

NATURA-SORB

SpilMax[®] Natura-Sorb Floor Sweep is typically used for hydrocarbon based spills.

Manufactured from recycled organic fibres which are treated, pelletised and processed to provide a granulated floor sweep. Natura-Sorb Floor Sweep has added weight and a lower dust factor for easy application.

This product meets the EPA criteria for disposal at land fill.

CH1998	BAG	5 KG	96/PALLET

REMEDIAL

SpilMax[®] Remedial Floor Sweep is designed for use on contaminated soil such as lawn areas. It is a bioremediation product. Once added to contaminated soil, the enzymatic action of the bacteria accelerates the natural decomposition of hydrocarbons, effectively returning the altered environment to its original condition with no disposal costs.

This product meets the EPA criteria for disposal at land fill.
